

Biography of PL Zhou

Peilin Zhou is professor of marine engineering in the Dept. of Naval Architecture, Ocean and Marine Engineering at the University of Strathclyde, UK. He obtained BEng 1982, MSc 1985 in Marine Engineering from Dalian Maritime University, China, PhD 1992 from the University of Newcastle upon Tyne, UK. Prof. Zhou's research interests and activities include marine environmental protection, engine emission reduction, ship ballast water management, LNG fuelled ship, biodiesel, fuel cell application on ships. His expertise areas also cover diesel engine performance enhancement, engine cycle and combustion simulation and

marine engineering systems.

Prof. Zhou has been coordinating and participating in a number of EU and industry funded projects in his specialist areas and published over 150 research papers on referred international journals and conferences.
